## EUROPEAN PATENT APPLICATION

(21) Application number: 88307793.5

(51) Int. Cl.<sup>5</sup>: C12Q 1/68 , //C07H21/02

(22) Date of filing: 23.08.88

(30) Priority: 24.08.87 US 88737

(43) Date of publication of application:  
01.03.89 Bulletin 89/09

(54) Designated Contracting States:  
BE DE ES FR GB IT LU NL

(59) Date of deferred publication of the search report:  
02.05.90 Bulletin 90/18

(71) Applicant: ORTHO DIAGNOSTIC SYSTEMS  
INC.

U.S. Route 202  
Raritan New Jersey 08869(US)

(72) Inventor: Zivin, Robert A.  
16 Fieldstone Place  
Flemington, N.J. 08822(US)  
Inventor: Monahan, John A.

(54) Methods and probes for detecting nucleic acids.

(57) An in solution hybridization method utilizes two soluble oligonucleotide probes. One of the probes has a homopolynucleotide tail which is captured by a solid support coated with a complementary homopolynucleotide. A ribosomal RNA sequence specific to M. pneumoniae and synthetic probes complementary thereto are provided. Methods are provided for specifically identifying the presence of Mycoplasma pneumoniae 16S ribosomal RNA in a sample by using at least one synthetic nucleic acid probe complementary to the 16S ribosomal RNA in a hybridization assay. The methods comprise providing at least one synthetic probe which has a sequence complementary to at least a portion of a ribosomal RNA sequence specific to M. pneumoniae.

Office

### CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claims:
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

### X LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions.

namely:

1. Claims 1-6: a solution hybridization assay method
2. Claims 7-11: detection of mycoplasma using nucleic acid probes

- ☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☐ None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:
